

WALL PROTECTIONS  
AND HANDRAILS

## WHO ARE WE?

Specialist in wall protections and handrails for 40 years, SPM, a Gerflor Group Company, develops innovative and decorative solutions to protect, enhance and ensure the sustainability of buildings open to the public.

Hospitals, clinics, retirement homes, specialised centres, your infrastructures represent your working tool and assets.

You work in an environment in which movement represents a risk: risk of shock, falls, impact.

Each of your needs has been studied with your teams (nursing staff, hygienists, technical teams, etc.) and your partners (architects, fitters, quantity surveyors, etc.).

Thanks to this ongoing cooperation, SPM has developed effective solutions, suited to your needs.

## WE OFFER SOLUTIONS THAT MEET YOUR REQUIREMENTS

### HYGIENE AND DECONTAMINATION

- 100% antibacterial (reports by Nosoco.tech)
- 100% decontaminable (tests by Anios and Institut Pasteur)
- 100% watertight with the hot-welded Decochoc / vinyl floor system

### ATTRACTIVE AND DECORATIVE

- Wide selection of colours and decorative cutouts
- Enhancement of premises through easier maintenance

### RESISTANCE

- Resistance to impacts, shocks and scratches

### ENVIRONMENT

- Exemplary composition (no heavy metals, PBT-free, BPA-free, very low VOC emissions, etc.)
- 100% recyclable range
- Lower environmental impact during installation and use

### EASY AND QUICK INSTALLATION

- Suitable for installation by a technician
- Limited installation-related nuisances and disturbances: installation while in use (solvent-free glue, etc.)

### MAINTENANCE

- Easy care and cleaning
- Lower maintenance costs

### CONFORMITY

- Comply with the French laws for public buildings

### LONGER SERVICE LIFE

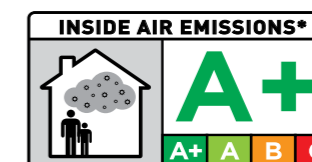

- Increase service life of premises
- Avoid repainting and repairing damaged areas

### ACCESSIBILITY

- Comply with the French interministerial circular Nr DGUHC 2007-53 du 30/11/07

## EACH OF YOUR EXPECTATIONS IS MET

- According to French regulations -  
\* Information about the emission level of volatile substance in inside air, involving a toxic risk by inhalation, on a scale from A+ (very low emissions) to C (high emissions).

SPM is constantly innovating to continue to meet your needs. Discover the latest new products from the wall protections and handrails expert.

## ▶ 47 COLOURS AND FINISHES

A design and trend colour swatch with the help of our partners architects and colourists in order to offer greater choice.

## ▶ RAPID'SYSTEM®

Rapid'System® solutions for handrails with:

- Rapid'Angle® for staircases and corners
- Rapid'Access® for service ducts

## ▶ DECOPRINT

Decoprint panel

to decorate and customise your walls and doors (reproduction of photos, drawings, messages, logos, etc.)

## ▶ FIN'COLOR

The finishing and jointing profiles Fin'Color

provide an aesthetic finish and a perfect joint between panels and flexible floor covering

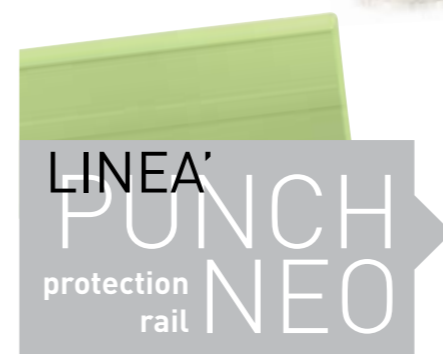

## ▶ LINEA RANGE

A range combining design, ergonomics and performance with confirmed effectiveness.

- A handrail with a uniform design throughout the building, whatever the level of protection required
- Exclusive trilobed shape recommended by ergonomists for optimised grip, support and guidance
- Large selection of accessories and colours for endless combinations
- Available in LED option, it offers a user guiding system thanks to integrated lighting

- A contemporary and discreet wall protection rail, 180 mm high, matified with a central boss, that blends with the new Linea'Touch handrail
- Bevelled end pieces limiting projection, distance to door frames and tearing

- An attractive and resistant corner protector that adjusts to all angles from 80° to 115° and to all heights due to its variable angle endcap
- Maximum impact resistance and safety due to impact-absorbing dampers

## ▶ DECOCHOC H<sub>2</sub>O

The Decochoc H<sub>2</sub>O panel

protects walls and doors in wet rooms and provides complete watertightness

## ▶ DECOSMIC

The Decosmic panel

and its metallic colours embellish and protect your spaces in an elegant and on-trend way.

- Handplate
- Half-height door protection (straight or decorative)
- Inlaid signage

Decochoc or Decosmic protection and covering panels

# HIGH-TRAFFIC CORRIDORS

## PROOF AGAINST IMPACTS

Whether in hospitals, clinics, retirement homes or specialised centres, continuous personal and wheeled equipment traffic in the wards increases the frequency of impacts considerably. Walls and their protruding parts, edges, are subject to direct impacts by trolleys, stretchers or beds travelling through corridors. Wide open doors are also regularly damaged, particularly on the edges and frames. Finally, patients moving around generally have reduced mobility; aiding them in their mobility and ensuring their safety remain a priority.

Decochoc or Decosmic protection and covering panels

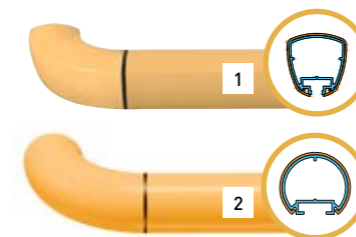

# MODERATE-TRAFFIC CORRIDORS

## PROTECT AND GUIDE

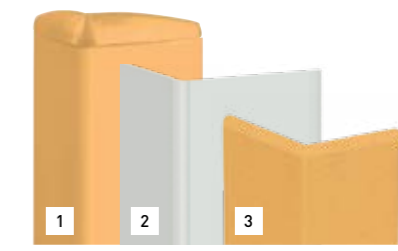

Moderate-traffic corridors are often used to get around buildings such as retirement homes, geriatric wards, nursing homes and specialised facilities. Patients, nursing staff, visitors and also the wheeled equipment assigned to the ward (medical care, meals, laundry, etc.) travel through and meet in these corridors. For this reason, wall protection is required on the areas subject to the greatest risk, along with mobility aids.

1. LINEA'TOUCH - PVC-SHEATHED

Decochoc or Decosmic protection and covering panels

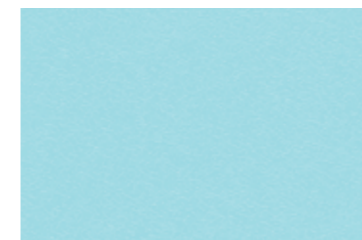

# PATIENT ROOMS

COMBINE COMFORT AND PROTECTION

In patient rooms, the major risk is associated with moving the furniture: variable-height beds, wheelchairs, chairs, tables are the main causes of damage. Visits from visitors and nursing or cleaning teams can all potentially cause impacts.

# LIVING AREAS AND PANTRIES

## PROTECTING YOUR ENVIRONMENT

In areas accommodating residents for their meals, leisure, in reception areas or in areas intended for the use of the nursing staff and service teams, facilities are subject to a wide array of risks: impacts caused by wheelchair and trolley traffic, friction due to the movement of chairs or tables, moving people, etc. The areas of impact and their extent are difficult to predict. For this reason, maximising surface protection is a priority.

- Decochoc
- Thermowelded Decochoc
- Plac'Inox
- Decocare
- Linea'Flex
- Cornea or Corneaflex
- Profil'Inox

With hygienic PVC seals

# OPERATING THEATRES AND STERILISATION

## PRIORITY TO HYGIENE

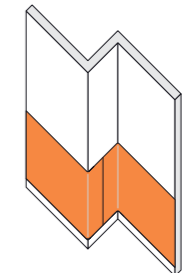

In this highly sensitive sector, sanitary risk is still enemy number one. Surface coverings are subjected to the use of strong, corrosive chemicals and they need to be able to withstand these chemicals without any damage. In addition, full-height protection of the facilities is required, due to potential impacts caused by instrument trolley movements and incoming and outgoing stretchers.

**DECOCLEAN**  
Smooth protection and covering panel

# LOGISTIC AREAS AND KITCHENS

HYGIENE AND PROTECTION ARE ESSENTIAL REQUIREMENTS

Hygiene and protection are essential requirements. In specialised or public health centres, from the kitchen to the laundry, including the areas used for waste, the requirements are the same. In these areas, wall protection needs to be effective in terms of care and high resistance, due to traffic of trolleys with very heavy loads.

### PVC-SHEATHED

Available in 31 colours

### DECOWOOD

Available in 6 wood effect decors

### ANODISED

Available in silver anodised version

## BACTERICIDAL JOINT

The roughness of the handrail, at the junction between profile sections and finishing accessories, collect the majority of contamination and are the most difficult points to clean. For this reason, all SPM handrails are fitted with bactericidal joints, treated integrally and undamaged by cleaning. Their bactericidal action, proved by an independent laboratory, complements the bacteriostatic and antibacterial properties of our handrails in a smooth finish.

Discover the technical solutions in our catalogue, available on request.

# PROTECT AND EMBELLISH

## A PALETTE OF 33 COLOURS

Let wall protection play a dynamic role in decoration

### NATURAL

SPM offers a range of colours designed with the help of architects, interior designers, users, etc. The colour chart of 33 colours, from the most sober to the most daring, gives a new identity to interior designs whilst blending perfectly with other decorative elements such as floors, walls, doors, etc.

This palette brings together neutral, sober, mineral shades that blend naturally with architectural design and vivid, refreshing, full-bodied and youthful colours. Tinted greys now appear in the palette to provide subtle, muted ambiances.

Let SPM wall protection play a dynamic role in the aesthetic appearance of your facility.

### COLOUR

#### Please note

- LRV (Light Reflectance Value) measures based on Decochoc panel.
- Most of our products are available in all 33 colours in the range, or 31.

Colours are not contractually binding.
