WALL PROTECTIONS AND HANDRAILS

spm-international.com

Sp^m
wall protection

Your facilities, whether hospitals, clinics, nursing homes or specialised institutions, are subject to risks of shock, fall and impact and must guarantee absolute hygiene.

SPM wall protections and handrails can withstand any degree of impact and wear, from occasional to heavy traffic, while providing assistance to people in complete safety.

We develop antibacterial and bacteriostatic PVCs that prevent the build-up of germs and that can resist disinfectant products.

HEALTHCARE

HEALTHCARE

The heavy or repeated traffic of pupils and toddlers can cause heavy and premature wear and tear. SPM offers solutions suitable for every space to reduce traces of friction, marks on walls and impacts from furniture, thus extending the life span of the facilities.

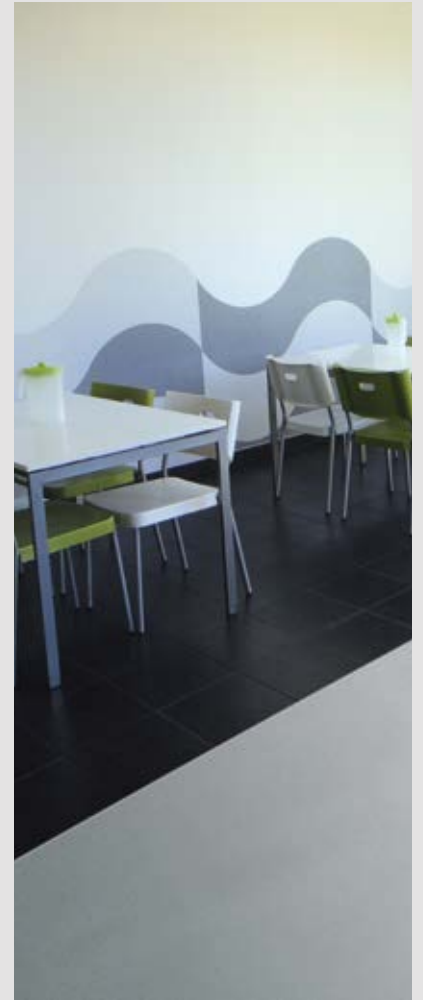

SPM solutions can meet your requirements for resistance and hygiene and create a welcoming and easy-to-maintain living and working environment at reduced maintenance costs.

EDUCATION

EDUCATION

In the world of pharmaceutical industry and cleanrooms in particular, the control of bacteriological or particulate contamination is of paramount importance. Moreover, the movements of trolleys, instruments and stretchers are sources of shocks.

SPM develops wall protection solutions that meet these requirements of hygiene, safety and resistance, to protect the premises quickly and lastingly without disrupting the activity.

INDUSTRY

INDUSTRY

The impacts of balls and sticks, the shock of gymnastic equipment, the wear and tear on the walls of physical activity rooms cause damage to the premises. Changing rooms, and particularly shower areas, should be protected from the ravages of moisture (corrosion, mould).

SPM offers a wide range of solutions to protect walls, doors and corners from impacts and make wet areas more watertight.

SPORT

SPORT

HOTELS

HOTELS

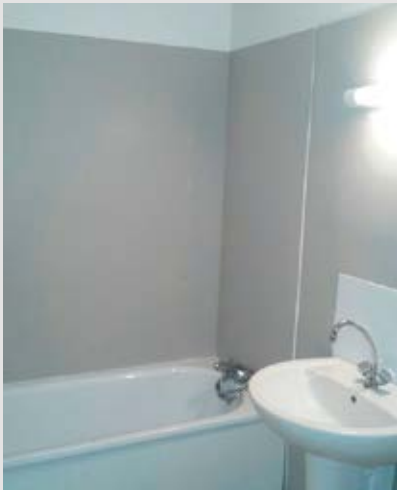

Intensive movement of people, dirt and degradation:
so many reasons why these collective infrastructures
need protection.

SPM solutions preserve the premises lastingly
from shocks on walls, doors and corners and
facilitate maintenance and cleaning.

They offer a pleasant and safe living environment
in line with your requirements for hygiene and safety.

HOUSING

HOUSING

In environments where the traffic of people is continuous or heavy, resistance to impact and friction is crucial just as much as design. SPM solutions delay the wear caused by furniture and equipment on walls and doors, footprints, dirt around handles and damage. They enhance your institution by providing a decorative touch or can be discreet and blend into the background.

OFFICES & PUBLIC BUILDINGS

OFFICES & PUBLIC BUILDINGS

Shops storage areas are constantly stressed by the movement of people, friction and impacts of equipment and cleaning trolleys.

SPM solutions provide a durable protection of walls, doors and corners, are resistant to shock, friction, dirt and frequent washing, and are quick and easy to install in order not to disrupt the activity. They enhance the premises with a wide range of aesthetic and decorative solutions.
