## Wall Protections & Handrails

**Spm**<sup>®</sup>  
wall protection

# Know-how for over 40 years

## WALL PROTECTIONS AND HANDRAILS SPECIALIST

SPM, a Gerflor Group company, offers solutions for protecting walls, doors and corners and for assisting people moving around in compliance with French legislation applicable to public buildings.

## AWARE OF THE REQUIREMENTS OF EACH

Present in education, healthcare, housing, sport, hospitality, industry and shops markets... and aware of the requirements of each, SPM develops products that are resistant to shocks, scratches, cleaning agents and disinfectants, Bs2d0 fire-rated and easy-to-install while adopting an environmentally responsible approach. SPM wall protections and handrails blend seamlessly into all locations thanks to a wide choice of colours and designs.

## NEAR YOU ACROSS THE WORLD

Because providing you with solutions perfectly tailored to your needs has been our priority for more than 40 years, we have established sales divisions near you. In France and in other countries, your SPM contacts know your infrastructures, your requirements, those relevant to your sector of activity and can answer any technical questions you may have.

Hospitals, clinics, retirement homes, specialised centres, your infrastructures represent your working tool and assets. You work in an environment in which movement represents a risk: risk of shock, falls, impact. Each of your needs has been studied with your teams (nursing staff, hygienists, technical teams, etc.) and your partners (architects, fitters, quantity surveyors, etc.). Thanks to this ongoing cooperation, SPM has developed effective solutions, suited to your needs.

## WE OFFER SOLUTIONS THAT MEET YOUR REQUIREMENTS

**100%**  
ANTIBACTERIAL

### HYGIENE AND DECONTAMINATION

- 100% antibacterial (reports by Nosoco.tech)
- 100% decontaminable (tests by Anios and Institut Pasteur)
- 100% watertight with the hot-welded Decochoc / vinyl floor system

### ATTRACTIVE AND DECORATIVE

- Wide selection of colours and decorative cutouts
- Enhancement of premises through easier maintenance

### RESISTANCE

- Resistance to impacts, shocks and scratches

### ENVIRONMENT

- Exemplary composition (no heavy metals, PBT-free, BPA-free, very low VOC emissions, etc.)
- 100% recyclable range
- Lower environmental impact during installation and use

### EASY AND QUICK INSTALLATION

- Suitable for installation by a technician
- Limited installation-related nuisances and disturbances: installation while in use (solvent-free glue, etc.)

### MAINTENANCE

- Easy care and cleaning
- Lower maintenance costs

### CONFORMITY

- Comply with the French laws for public buildings

### LONGER SERVICE LIFE

- Increase service life of premises
- Avoid repainting and repairing damaged areas

### ACCESSIBILITY

- Comply with the French interministerial circular Nr DGUHC 2007-53 dated 30/11/07

## EACH OF YOUR EXPECTATIONS IS MET

VIRUCIDAL

HYGIENE & SAFETY

# A range that respects the environment

SPM has always considered its customers and the environment as absolute priorities. Our wall protections and handrails are designed to last as long as possible, make life easier for users and preserve their health. We are focused on our ambition of providing increasingly eco-friendly solutions by working on each stage in the product lifecycle, from design and production through to use and end-of-life.

## TAKE A CLOSER LOOK AT OUR ACTIONS:

**Design**  
Eco-design, a top priority

**Production**  
Produce while minimising our footprint

**Use**  
User health and safety come first

**Building certification**  
Go beyond regulatory requirements

## Design Eco-design, a top priority

### • EXEMPLARY COMPOSITION

#### Sustainable formulation

SPM PVC products contain no heavy metals, such as lead, cadmium, arsenic and tin, and are PBT-free (Persistent Bioaccumulative Toxic substances) and BPA-free (Bisphenol A).

#### Calcium-zinc thermal stabilisation

For several years, SPM has chosen to use calcium-zinc stabilisation, which is non-toxic and harmless for the environment. SPM is therefore ahead of the game, emphasising yet again its commitment to sustainable development.

### • TRANSPARENT COMMUNICATION ABOUT OUR PRODUCTS' CARBON IMPACT

Environmental & Health Product Declarations (EHPDs) measure the carbon impact at each stage in the product's lifecycle, including raw materials, production, transport, implementation and end-of-life.

These declarations are **carried out by an independent laboratory** and used to measure and compare the environmental impacts of the different products, materials, and so on.

The EHPDs for the PVC wall protection panels are available on request.

### • RESTRICT THE USE OF CLEANING PRODUCTS

The finish on our products (smooth or slightly textured) has been specifically designed to ensure easy cleaning and consequently **reduce the amount of water and detergents used**. In addition, fitting our wall protections can considerably extend the intervals between wall repairs and renovation work.

### • 100% REACH-COMPLIANT FORMULATIONS

REACH (Registration, Evaluation, Authorisation and restriction of Chemicals) is a European regulation aimed at creating a safer framework for the production and use of chemicals in European industry and thereby improving **protection standards for human health and the environment** against chemical-related risks.

REACH is used to list, evaluate and restrict the chemicals manufactured, imported and placed on the European market.

We guarantee that our products do not contain **any substances** on the REACH restrictions list.

### • GUARANTEE SUSTAINABLE AND LONG-LASTING PRODUCTS

A product's service life is one of the most important criteria in terms of its impact on the environment. We are committed to manufacturing **sustainable products**.

Our products have an average service life of 25 years!

## Production Produce while minimising our footprint

### • RECYCLING

Our materials are mainly PVC and aluminium, and are therefore **100% recyclable**. All our offcuts are recycled into the manufacturing process.

### • A CUTTING SERVICE TO REDUCE WASTEFUL OFFCUTS

SPM provides its customers with a cutting service (depending on the models) prior to shipping. Factory-based pre-cuts **avoid wasteful offcuts at the installation site**.

### • AVERAGE CONTENT OF RECYCLED MATERIALS IN OUR PRODUCTS

Several years ago, we began incorporating recycled PVC into our panel manufacturing processes.

To date, our PVC wall protection panels include an average of **24% recycled materials**, and our aluminium profiles may contain up to **60% recycled aluminium**.

## Use User health and safety come first

### • IMPROVE INDOOR AIR QUALITY

Our products are tested in accordance with ISO 16000-6 and emit less than 100 µg/m³ after 3 days, which is tiny compared to the threshold. Therefore, our products have an **A+ rating**. In addition, they do not emit any formaldehyde.

According to French regulations  
\* Information about the emission level of volatile substance in inside air, involving a toxic risk by inhalation, on a scale from A+ (very low emissions) to C (high emissions).

### • GREENGUARD GOLD-CERTIFIED PANELS

Our panels have been awarded the Greenguard Gold label for their **low emissions** ensuring good indoor air quality.

### • SOLVENT-FREE ADHESIVES

We recommend the use of SPM adhesives to install our products, either a water-based acrylic adhesive or a universal MS polymer-based mastic glue. Our adhesives are **solvent-free** and therefore present no threat to users' health or the environment.

## Building certification Go beyond regulatory requirements

All SPM solutions can extend a facility's service life and considerably widen the intervals between wall / door repair and renovation work. As such, they can contribute to environmental building certification, where their contribution varies depending on the product characteristics and technologies used.

### • HQE STANDARD

In France, the HQE High Environmental Quality standard is a **global approach** specifying criteria for buildings to «manage impacts on the outdoor environment and create a pleasant and healthy indoor environment».

SPM products can be used in building projects aimed at achieving High Environmental Quality certification for their high environmental performance.

### • LEED™ CERTIFICATION

LEED™ (Leadership in Energy and Environmental Design) is a renowned international green **building certification system** developed by the US Green Building Council (USGBC).

SPM products can provide points towards LEED™ certification.

# Solutions for your facilities

# High-traffic corridors

## Proof against impacts

### YOUR CONCERNS

- ✓ Continuous traffic, marks and wear
- ✓ Repeated impacts caused by trolleys, beds and stretchers on walls and corners
- ✓ Impacts on doors, edges, frames
- ✓ Wall and door protection
- ✓ Safe movement of people with reduced mobility
- ✓ Visual identification
- ✓ Pleasant and welcoming premises
- ✓ Hygiene and care

### OUR SOLUTIONS

Whether in hospitals, clinics, retirement homes or specialised centres, continuous personal and wheeled equipment traffic in the wards increases the frequency of impacts considerably.

Walls and their protruding parts, edges, are subject to direct impacts by trolleys, stretchers or beds travelling through corridors.

Wide open doors are also regularly damaged, particularly on the edges and frames. Finally, patients moving around generally have reduced mobility; aiding them in their mobility and ensuring their safety remain a priority.

**LINEA'TOUCH+ - PVC-SHEATHED**  
PVC-sheathed trilobed handrail  
(reinforced version)

**LINEA'DUO**  
Protection handrail

**STARLINE - PVC-SHEATHED**

with variable angle endcap

**1. CORNEA**  
90° corner protector on aluminium core  
**2. CORNEAFLEX**  
135° and variable angle corner protectors  
on aluminium core

# Moderate-traffic corridors

## Protect and guide

### YOUR CONCERNS

- ✓ Regular traffic, marks and wear
- ✓ Impacts caused by ward trolleys or wheelchair footrests on walls and corners
- ✓ Safe movement of people with reduced mobility
- ✓ Wall and door protection and decoration
- ✓ Visual identification
- ✓ Pleasant and welcoming premises
- ✓ Hygiene and care

### OUR SOLUTIONS

Moderate-traffic corridors are often used to get around buildings such as retirement homes, geriatric wards, nursing homes and specialised facilities.

Patients, nursing staff, visitors and also the wheeled equipment assigned to the ward (medical care, meals, laundry, etc.) travel through and meet in these corridors. For this reason, wall protection is required on the areas subject to the greatest risk, along with mobility aids.

- 1. LINEA'TOUCH - PVC-SHEATHED**  
Trilobed handrail  
LED option - Please consult us -
- 2. ESCORT - PVC-SHEATHED**

variable angle endcap
- 2. PROTECTA 2**  
Variable angle flexible adhesive corner protector
- 3. COMBO'CORNER**  
90 and 135° corner protectors on aluminium core

# Patient rooms

## Combine comfort and protection

### YOUR CONCERNS

- ✓ Impacts to walls and corners due to moving furniture (bed, armchair, wheeled table, bedside table)
- ✓ Friction caused by moving people
- ✓ Marks on walls and wear
- ✓ Hygiene and care
- ✓ Sharp angles and patient safety
- ✓ Visual identification on doors
- ✓ Pleasant and welcoming space
- ✓ Watertightness in damp rooms

### OUR SOLUTIONS

In patient rooms, the major risk is associated with moving the furniture: variable-height beds, wheelchairs, chairs, tables are the main causes of damage. Visits from visitors and nursing or cleaning teams can all potentially cause impacts.

**DECOCHOC**  
Protection and covering panel  
(walls or doors)

**DECOWOOD**  
Decorative protection and covering panel  
Wood effect

**DECOTREND**  
Decorative protection and covering panel

- 3. PROFILA**  
90° adhesive corner protector

# Living areas and pantries

## Protecting your environment

### YOUR CONCERNS

- ✓ Impacts caused by wheelchair and trolley traffic
- ✓ Friction with chairs and tables
- ✓ Moving people
- ✓ Hygiene and care
- ✓ Sharp angles and personal safety
- ✓ Pleasant and welcoming place
- ✓ Indicate and inform

### OUR SOLUTIONS

In areas accommodating residents for their meals, leisure, in reception areas or in areas intended for the use of the nursing staff and service teams, facilities are subject to a wide array of risks: impacts caused by wheelchair and trolley traffic, friction due to the movement of chairs or tables, moving people, etc. The areas of impact and their extent are difficult to predict. For this reason, maximising surface protection is a priority.

**IMPACT**  
Curved protection rail

**CONTACT**  
Adhesive protection plate

**DECOCHOC**

# Operating theatres and sterilisation

## Priority to hygiene

### YOUR CONCERNS

- ✓ Protection of high infection risk areas
- ✓ Care, hygiene and perfect waterproofing seal
- ✓ Impacts caused by instrument trolleys stretcher against walls and doors
- ✓ Protection of facilities

Hospital - Longjumeau (France)

### OUR SOLUTIONS

In this highly sensitive sector, sanitary risk is still enemy number one. Surface coverings are subjected to the use of strong, corrosive chemicals and they need to be able to withstand these chemicals without any damage.

In addition, full-height protection of the facilities is required, due to potential impacts caused by instrument trolley movements and incoming and outgoing stretchers.

**DECOCLEAN**  
Smooth protection and covering panel

**DECOCHOC**  
Protection and covering panel (walls or doors)

**PROFIL'INOX 30 ET 50**  
Brushed stainless steel adhesive corner protectors

# Logistic areas and kitchens

Hygiene and protection are essential requirements

- YOUR CONCERNS**
- ✓ Hygiene, cleaning and care
  - ✓ Impacts caused by trolleys, rolls, ovens, containers against walls and corners
  - ✓ Friction caused by moving people
  - ✓ Marks on walls and wear
  - ✓ HACCP\* protocol compliance
  - ✓ Watertightness in damp rooms
  - ✓ Complies with food contact requirements
- \* Hazard Analysis Critical Control Point

## OUR SOLUTIONS

Hygiene and protection are essential requirements. In specialised or public health centres, from the kitchen to the laundry, including the areas used for waste, the requirements are the same.

In these areas, wall protection needs to be effective in terms of care and high resistance, due to traffic of trolleys with very heavy loads.

**IMPACT**  
Curved protection rail

**DECOCHOC**  
Protection and covering panel (walls or doors)

**DECOCHOC H<sub>2</sub>O**  
Protection and covering panel in wet areas

**PROFIL'INOX 30 ET 50**  
Brushed stainless steel adhesive corner protectors

**1. ELASTO'FLEX**  
Variable angle corner protector

**2. ELASTO'PUNCH 200E**  
Protection rail - 200 mm high

**3. ELASTO'PUNCH 100D**  
Protection rail - 100 mm high

# Staircases

## YOUR CONCERNS

- ✓ Safety
- ✓ Accessibility standard
- ✓ Voluntary damage
- ✓ Dirt
- ✓ Sharp angles

## OUR SOLUTIONS

Staircases are areas subject to frequent use and high risks.  
Hand grip is a priority to help guide patients and nursing staff in complete safety, with continuous guide rails.

## ACCESSORIES

### PATENTED

### RAPID'ANGLE®

Adjustable and variable 3D angle (80° to 180°) for staircases and corners. Made of antibacterial PVC with bactericidal joints.

Available for Escort and for Linea'Touch

### PATENTED

### RAPID'ACCESS®

Articulated link for service ducts. Made of antibacterial PVC with bactericidal joints.

Available for Escort only (Chalk or anodised look)

## BACTERICIDAL JOINT

The roughness of the handrail, at the junction between profile sections and finishing accessories, collect the majority of contamination and are the most difficult points to clean. For this reason, all SPM handrails are fitted with bactericidal joints, treated integrally and undamaged by cleaning. Their bactericidal action, proved by an independent laboratory, complements the bacteriostatic and antibacterial properties of our handrails in a smooth finish.

# A new palette of 39 colours

Let wall protection play a dynamic role in decoration

### SPM OFFERS...

... a range of colours designed with the help of architects, interior designers, users, etc. The colour chart with 39 colours, from the most sober to the most daring, gives a new identity to interior designs whilst blending perfectly with other decorative elements such as floors, walls, doors, etc.

This palette brings together neutral, sober, mineral shades that blend naturally with architectural design and vivid, refreshing, fullbodied and youthful colours. Tinted greys provide subtle, muted ambiances. Let SPM wall protection play a dynamic role in the aesthetic appearance of your facility.

### PLEASE NOTE

- LRV (Light Reflectance Value) measures based on Decochoc panel.
- In order to speed up delivery of your orders, we have adapted our colour range in line with our products. Most of our products are available in all 39 colours in the range.

# Decowood Range

## 7 WOOD EFFECT DECORS

**A COORDINATED RANGE**  
SPM offers a full range of decorative wood decors for use in those establishments that wish to combine wall protection and handrails with the warmth of wood. This range consists of products matched to various requirements, providing safety for all with the Escort, Linea and Starline handrails, wall and door protection with Decowood protection panel and corner protection with the bent Decowood panel.

**A WIDE CHOICE OF WOOD DECORS**  
The range has been expanded with two new wood decors, chosen to suit all interiors. To the five existing decors Maple, Light Oak, Stripped Pine, Cedar and Smoky Cedar, we have added Cherry and Walnut.

### Linea'Touch Decowood Handrail

### Escort Decowood Handrail

### Starline Decowood Handrail

### Adhesive corner protector in bent Decowood
